MediaMatrix is used all over the world. First appearing within the U.S. Senate Chamber, it can now be found in places including: the Parliament Houses of China, New Zealand, Russia and Germany; the Sydney Opera House in Australia, the Opryland Convention Center in Tennessee and in over one-fourth of the NFL stadiums in North America. And the list goes on.

MediaMatrix is the leading audio, communication and media system for the professional audio industry. And because of Peavey's dedication to constant growth, we're confident that it will remain so, well into the future.
